

How to get rid of unwanted spacing between paragraphs in Microsoft WORD

1. Open your document in WORD
2. Select the entire document (I use CTRL + A)
3. Click on the corner of the Paragraph Tab
4. Go down to Spacing.
5. If Before and After are blank, type in 0 pt in each. If there are numbers in Before and After, change them to 0 pt
6. While there, you can easily adjust your line spacing
7. Click OK
